## About me

I am a self-taught Web developer with a strong understanding of HTML, CSS, SAAS, JAVA SCRIPT and BOOTSTRAP. I work with these technologies on a daily basis, and I also have loads of personal projects to demonstrate that knowledge. Working hard is very much a part of my personal identity. I love my pace of life and would bring all the interpersonal and time management skills that are such a core part of my work life to this role.

I imagine a project and draw it on the paper and implement with the help of HTML, CSS and JS. I remember when I made my first website, I was so excited about couldn't stop clicking that button and since then I didn't look back and kept on working on my skills and understanding of web development and web designing.

My zeal to learn more and more brings me always on a bigger challenge, as I started my journey with WordPress development and I used to do little bit of code changes according to my need, that was the beginning to this point where I make everything on my own for my projects.

Life has been a long journey of a constant learning.

For more details, please visit my GitHub (profile link is mentioned above).

## Work Experience

- Work Experience at "Soft Smart Services" Digital Services | Aug 2015 - Present |
